

What are China Mobile's outdoor base stations

Overview

How many 5G base stations does China Mobile have?

China Mobile, one of the country's leading telecommunication operators, has built more than 385,000 5G base stations. The stations provide 5G services for all prefecture-level cities and some major counties in the country, China Mobile's general manager Dong Xin said at a conference in Wuhan, in central China's Hubei Province.

How many 5G base stations will China build in 2025?

China plans to construct over 4.5 million 5G base stations in 2025 while introducing additional policy and financial incentives to support industries expected to shape the next decade, the country's Ministry of Industry and Information Technology (MIIT) previously announced during its annual work conference.

How many 5G base stations are there in 2024?

"Accumulatively, there were over 2.4 million 5G base stations put into use [at the end of 2024]. We have built the world's first large-scale commercial 5G-A network, with RedCap covering all cities nationwide and gigabit broadband covering 480 million households," said China Mobile in its annual report.

How did China Mobile perform in a year?

For the full year, China Mobile reported a five percent increase in net profit, reaching CNY138.4 billion, while operating revenue climbed 3.1 percent to CNY1 trillion. Service revenue grew three percent to CNY889.5 billion, and product sales saw a 3.8 percent increase to CNY151.3 billion.

What will China do with the 5G push?

Alongside the 5G push, China will also start trials for 10-gigabit optical networks and optimize computing power centers amid an artificial intelligence (AI) boom brought on by ChatGPT.

Will China establish a beachhead for 6g?

In fact, Chinese academic researchers and telecom operators are leaving no stone unturned in efforts to establish a beachhead for 6G. In July, China developed the world's first 6G field test network that integrates communications and intelligence, demonstrating that the transmission capabilities of 6G can be reached on 4G and 5G technologies.
