

# **Which is the largest energy storage station in the Netherlands**

## Overview

---

Developer and operator SemperPower has launched its second large Battery Energy Storage System (BESS) in the Netherlands within a month. The new 30 MW, 68 MWh Pollux system is now the largest battery energy storage facility in the country. Where is the largest battery energy storage system in the Netherlands?

German energy major RWE AG (ETR:RWE) has officially opened one of the largest battery energy storage systems (BESS) in the Netherlands, a 35-MW/41-MWh facility at its Eemshaven power station. The Eemshaven battery energy storage system in the Netherlands. Image by: RWE AG.

How big is the battery storage system in Eemshaven?

The battery storage system in Eemshaven, inaugurated on 13 March, has a total capacity of 35 MW and a storage capacity of 41 MWh, and will be used to balance power supply and demand in the Dutch power grid, RWE says.

Where can I find pictures of the Eemshaven battery?

Pictures of the Eemshaven battery for media use are available at the RWE Media Centre (credit: RWE). More information on the Eemshaven battery can be found [here](#). RWE has commissioned one of the largest Dutch battery storage systems in the Netherlands at its Eemshaven power station.

How many GW of storage capacity does Eemshaven have?

In addition to the project at Moerdijk, the company currently has more than 2 GW of storage capacity under construction in the U.S., Australia and the UK. Pictures of the Eemshaven battery for media use are available at the RWE Media Centre (credit: RWE). More information on the Eemshaven battery can be found [here](#).

Why is RWE launching a battery in Eemshaven?

“The inauguration of RWE’s first battery for the Netherlands here in

Eemshaven marks a significant step in our ongoing commitment to enhance the country's energy infrastructure while growing our green energy storage portfolio", said Nikolaus Valerius, Chief Executive Officer (CEO) at RWE Generation.
