

# **Which outdoor power supply in Bulgaria is better**

## Overview

---

Which energy sources can be used in Bulgaria?

Renewable energy includes wind, solar, biomass and geothermal energy sources (although it is not yet known whether geothermal energy could generate any electrical power as only slightly over 100 degrees C had been found by 2023 ). Bulgaria has a high potential for solar irradiation, especially in the southern regions of the nation.

What is the standard electricity supply in Bulgaria?

Bulgaria's standard electricity supply is 220/230 volts AC with a frequency of 50 hertz. For other equipment, a transformer or adaptor is required unless the appliance has a multi-voltage option. Sockets in Bulgaria take standard European-style two pin plugs. The standard light bulb fitting in Bulgaria is a screw fitting.

Can electrical equipment run without a motor in Bulgaria?

Electrical equipment without a motor is generally unaffected by the drop in frequency to 50Hz. Equipment with a motor may run with a 20 per cent drop in speed; however, automatic washing machines, cookers and electric clocks are unusable in Bulgaria if not designed for 50Hz operation.

Do Bulgarian plugs need an Earth?

Bulgarian plugs have two round pins for the live and neutral connections, usually with a recessed contact at 90 degrees to the pins for the earth connection. Small, low-power (under around 5 amps) electrical appliances such as table lamps, small TVs and computers don't require an earth.

Which energy companies are operating in Bulgaria?

Three major energy companies are operating in Bulgaria. Electricity distribution network "WEST", serving customers in Sofia, Blagoevgrad, Kyustendil, Pernik, Pleven, Lovech, Montana, Vratsa, and Vidin. The

distribution network “SOUTH” is part of EVN Group.

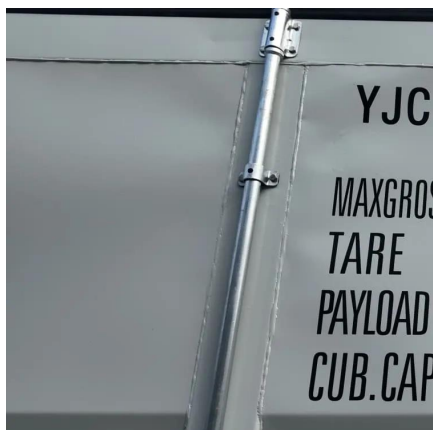

Can a washing machine run in Bulgaria?

Equipment with a motor may run with a 20 per cent drop in speed; however, automatic washing machines, cookers and electric clocks are unusable in Bulgaria if not designed for 50Hz operation. In rural areas the power supply can often weaken or fail, sometimes for a few minutes and sometimes for several hours.
