Why should you buy a portable power station?

Bring big backup power with you with these expert-recommended portable power stations, which can store enough power to charge electronics, appliances, and more.

How much power can a portable power station hold?

While a particular power station might claim to hold 1,000 watt hours, the actual amount of usable power you can get out of it is a different story. The best portable power stations also have an onboard computer that shows you how much energy is left in your unit, as well as how much power it's currently using.

What is the best portable power station with solar generator?

Jackery Solar Generator 2000 V2 Best portable power station with solar generator It's not the only power station with solar generation, but we found this unit from Jackery to be ideal for almost any home use, and has a capacity of 2042Wh. [Read more below.](#)

How long does a portable power station last?

A portable power station's lifespan depends on the type of battery inside. Most new portable power stations, including all the models we recommend here, feature LiFePO4 battery technology, which lasts far longer than older lithium-ion technology. [How much more?](#)

LiFePo4 power stations will last for more than 3,000 charge cycles, or about 10 years.
