

Who is the company behind the green base station for Norway Communications

Overview

Is Norway a member of the European Space Agency?

The Norwegian Space Agency (NRS) was established in 1987 when Norway became a member of the European Space Agency (ESA). In 1991, Tromsø Telemetristasjon (TTS) and its activities were incorporated into the Norwegian Space Agency, further consolidating Norway's capabilities and efforts in space research and satellite communication.

Why did space Norway invest in satellite communication?

Space Norway financed the installation of the first antenna dedicated to satellite communication at the Troll Station in Antarctica. This initiative significantly enhances the station's communication capabilities, fostering better connectivity and data transmission in one of the most remote regions on Earth.

Who owns Satellite Services in Svalbard?

In 2002, Space Norway separated its Svalbard satellite infrastructure business into a new subsidiary named Satellite Services AS. This company subsequently merged with Kongsberg Gruppen's activities on Svalbard, forming the new entity Kongsberg Satellite Services (KSAT).

What is the largest satellite program in Norway?

With an investment framework of approximately 450 million US dollars, ASBM stands as the largest satellite program ever conducted in Norway with two satellites in a highly elliptical orbit, providing broadband coverage north of the 65th parallel.

Does space Norway have satellite-based broadband in the Arctic?

Space Norway projects satellite-based broadband in the Arctic, marking a significant milestone in the company's history with the Arctic Satellite Broadband Mission (ASBM).

What can Norway do with satellite data?

“Norway has knowledge, research and competency to share with the rest of the world. Farmers in Africa can improve their crop yields with satellite data. Schoolchildren around the world can easily attend a rocket launch from Andøya online. Companies and researchers can collaborate to solve global issues by using and sharing satellite data.
